

# FUTURE MORELAND

## Q&A

Moreland City Council

### **What is Future Moreland?**

Future Moreland is Council's vision to best prepare our city and community for Moreland's projected population growth.

It is not a new strategy, but rather an umbrella for all the strategies and initiatives Council currently has in place to address the impacts of population growth. Its aim is to show the connection between the different actions and strategies Council has put in place and help our community make better sense of the strategies.

Currently, Future Moreland covers the following key focus areas:

- Transport
- Open space
- Housing
- Zero Carbon 2040.

Future Moreland also builds toward the delivery of Council's vision: *Moreland will be known for its proud diversity and for being a connected, progressive and sustainable city in which to live, work and play.*

Future Moreland connects to Council's Strategic Objectives:

1. Connected Community
2. Progressive City
3. Responsible Council

### **What is the purpose and aim of Future Moreland?**

- To demonstrate how Council is planning now for the future needs of our residents, businesses and visitors, to ensure Moreland remains a liveable city that celebrates its diversity, is forward-looking, equitable and environmentally conscious.
- To communicate all Council is doing to achieve this aim through consistent and ongoing communications and engagement with the community and other stakeholders.

### **Has Council approved it?**

Future Moreland is a vision and campaign to communicate the actions of a range of strategies and plans that connect to the Council Plan and have been approved by Council. It is therefore part of Council's operational business. Each strategy was developed following extensive consultation with the Moreland community.
